Catalog description:	<p>Coursework in chemistry spans the four traditional areas of analytical, inorganic, organic, and physical chemistry. Students may also pursue a degree in chemistry with a biochemistry subfield, involving significant coursework in biology. All majors must study beginning physics and calculus. Students may also design an interdisciplinary area of concentration in chemistry-related fields, such as geochemistry or environmental science. Beginning chemistry courses satisfy the physical sciences component of the general education requirements.</p> <p>Chemistry and biochemistry majors do hands-on work with chemical instrumentation and use computers in both software and hardware applications. The faculty prides itself on working closely with its students on undergraduate research projects, directed studies, and undergraduate teaching assistantships. In addition, chemistry majors are encouraged to complete summer research internships at university and industrial labs or at other research facilities, locally and nationally.</p> <p>Study in chemistry is the prerequisite for many preprofessional programs at UMM. Students who also do work in the Division of Education can obtain licensure in secondary education. More than sixty percent of UMM's chemistry/biochemistry majors pursue postgraduate work toward a doctoral degree--most of them in chemistry/biochemistry, many in medicine; but also in other health-related fields, such as veterinary medicine, pharmacy and dentistry; in biological fields related to chemistry; and in a variety of other fields. The others enter the job market upon graduation, primarily in the chemical industry or in secondary education.</p> <p>Objectives--the chemistry discipline is designed to serve students from other disciplines requiring knowledge of chemistry advance student learning in contemporary chemistry/biochemistry at</p>	<no change>

Narrative Materials		
Brief summary or overview of reason for proposed new program or rationale for changes:	A more explicit statement of objectives for purposes of assessment.	Course was split in two and one was mistakenly not listed in program requirements. This program change fixes the error.
Mission, priorities and interrelatedness:	This program predates PCAS development so no information is available for this field.	<no change>
Need and demand:	This program predates PCAS development so no information is available for this field.	<no change>
Comparative advantage:	This program predates PCAS development so no information is available for this field.	<no change>
Efficiency, effectiveness, and use of resources:	This program predates PCAS development so no information is available for this field.	<no change>

Program Requirements

Program length in credits:	120 credits	<no change>
Major length in credits:	59 to 76 credits	<no change>
Number of semesters of a second language that are required:	2	<no change>
Specific language(s) required:	Any Second Language	<no change>
Other requirements:	Courses may not be taken S-N. Up to 8 credits of coursework with a grade of D or D+ may be used to meet the major requirements if offset by an equivalent number of credits of A or B. A minimum GPA of 2.00 is required in the major to graduate. The GPA includes all, and only, University of Minnesota coursework. Grades of F are included in GPA calculation until they are replaced. Students should consult members of the chemistry faculty to plan programs of study appropriate to their interests and postgraduate goals.	<no change>

	Students may complete a major in chemistry through one of two tracks--the standard chemistry major or the chemistry major with a biochemistry subfield.
