Economics Updated Version of PSLOs:

The economics curriculum is designed to ensure that students will be able to

1. explain and illustrate how the methods of social science are applied by economists to the problems of human interaction.
2. describe and analyze the structure of markets and other key economic institutions.
3. explain the functioning of the United States and world economies.
4. apply both economic theory and the quantitative tools of economics to specific problems or questions.
5. find economic data and to read applied economic research.
