Changes in Education are due to:

1. Changes in licensure requirements (for SeEd, EIEd, and endorsement areas) relate to changes in courses, new courses, or scheduling. For example, all of the changes in French were changed in the licensure requirements for French. In the pre-primary endorsement area, new courses were added to electives, and to make the endorsement more accessible, some courses were moved to electives.
2. Insertion of MTLE requirement for student teaching into the narrative. Already passed for courses.
3. Changes in the 5-8 science endorsement so that the requirements are mostly the same whether the students go through the EIEd path or the SeEd path.

Please summarize the intent of the proposed changes.

The number of Education courses has been reduced for two reasons. First, courses related to sign language and deaf education have moved to the Humanities Division. Second, we have inactivated courses that have not been taught for a number of years.

Please summarize the intent of the proposed changes.

Most changes relate to state requirements for licensure. Passing scores on MTLE basic skills tests are now required for student teaching, both to ensure basic competency and to prevent students from spending the time and resources needed for student teaching when they will not be eligible for a license. Changes in endorsement area course requirements are due to changes in other disciplines. These include simple name changes (e.g. Psy 1081 changed to Psy 2581) and new courses that offer relevant choices for electives in the preprimary endorsement area (e.g. Psy3404). The middle level science endorsement has an additional required physics course to make this stand-alone license (General Science Grade 5-8) match the requirements held for students who earn the license through the secondary education program.

Catalog description:	A separate admissions process must be completed and admission granted before students enroll in this program. The elementary education major leads to Minnesota licensure as a teacher of grades K-6. Students obtaining a K-6 license may also pursue an optional endorsement in one of the following five areas: 1) preprimary, 2) middle level communication arts and literature, 3) middle level mathematics, 4) middle level science, and 5) middle level social studies. Objectives-Course work in elementary education is designed to meet standards of effective practice required for licensure and provide prospective teachers with opportunities to understand central concepts, tools of inquiry, and structures of disciplines taught in the elementary school; understand child and adolescent development theory, individual and group motivation and diversity among learners; create instructional opportunities adapted to learners of diverse cultural backgrounds and abilities; use instructional strategies and technologies that reflect personal knowledge of effective verbal, nonverbal, and media communication techniques; encourage development of critical thinking, problem solving, and performance skills; understand and use formal and informal methods of student assessment; and collaborate with parents/guardians, families, school colleagues, and the community in an ethical manner. Students pursuing Minnesota teaching licensure at the elementary K-6 level and optional endorsement areas must have successfully completed licensure requirements in the elementary teacher education program and passed state and federally mandated examinations for new teachers. A minimum GPA of 2.50 overall with 2.75 minimum GPA in elementary education major and licensure area(s). All courses that fulfill requirements for teaching licensure in elementary education (discipline, professional education, or other courses) must be completed with a grade of C- or better. Required courses must be taken A-F unless they are offered S-N only.	<no change>

Brief summary or overview of reason for proposed new program or rationale for changes:	Minnesota Board of Teaching changes resulted in numerous updates e.g. reading and technology standards, specialities/subplan now optional-world lang now sec. ed. changes to student teaching courses, some new courses required.	Passing scores on MTLT basic skills tests are now required for student teaching. Endorsement area requirement changes are due to course changes in other disc. The middle level science endorsement has an additional course to match the requirements for SeEd. Licensure is now a sub-plan.

Catalog description:	<p>This discipline is in the Division of Education. A separate admissions process must be completed and admission granted before students can enroll in this program. The secondary education program leads to Minnesota licensure as a teacher in specified liberal arts disciplines. Objectives--Coursework in secondary education is designed to meet standards of effective practice required for licensure and provide prospective teachers with opportunities to * understand central concepts, tools of inquiry, and structures of disciplines taught in the middle and secondary school; * understand adolescent development theory, individual and group motivation, and diversity among learners; * create instructional opportunities adapted to learners from diverse cultural backgrounds and with exceptionalities use instructional strategies that reflect personal knowledge of effective verbal and nonverbal communication techniques; * encourage development of critical thinking, problem solving, and performance skills; * understand and use formal and informal methods of student assessment; * plan and manage instruction; * engage in reflection and self-assessment; and * collaborate with parents/guardians, families, school colleagues, and the community in an ethical manner. To obtain a teaching license, an individual must have completed a major, a bachelor's degree, and licensure requirements in the area(s) in which licensure is sought. UMM is approved to recommend teaching licensure in the following fields: chemistry (9-12), communication arts and literature (5-12), earth and space science (9-12), French (K-12), general science (5-8), instrumental music (K-12), life science (9-12), mathematics (5-12), physics (9-12), social studies (5-12), Spanish (K-12), visual arts (K-12), and vocal music (K-12). Coursework required for licensure, in most cases, is not equivalent to a major. Consult an adviser in the discipline to determine major requirements. Students planning to seek Minnesota teaching licensure at the secondary school level must complete licensure requirements in the discipline(s) of the subject(s) they intend to teach, the secondary teacher education program, and state and federally mandated examinations for new teachers. A minimum GPA of 2.75 is required in licensure area(s) and in education prerequisite courses. A minimum GPA of 2.50 is required overall. The GPA includes all course work. Grades of "F" are included in GPA calculation until they are replaced. All courses required</p>	

for teaching licensure in secondary education (discipline, professional education, or other courses) must be completed with a grade of C- or better. Required courses must be taken A-F unless they are offered S-N only.

Middle and Secondary School Licensure Requirements

Students planning to teach in Minnesota middle and secondary schools must meet the licensure requirements of the Minnesota Board of Teaching (BOT).

The following program is designed to meet these requirements and they are subject to change when the BOT implements new rules.

Note: Students must complete licensure requirements and apply for licensure within seven years from time of admission to the program. After seven years, all education courses previously taken are void and must be retaken.

1. Professional education courses:

ED 2121-Introduction to Education and ED 2111-Tutor-Aide Practicum

Required Course(s): <no change>

Focus course groups:

Title for this set of focuses: Area of focus: <no change>
Description for this set of focuses: Students work closely with their advisers to plan a program that satisfies the required competencies in a chosen sub-plan and in the social science disciplines. The sub-plan most often is demonstrated by completing the minor in that discipline. Program plans must be on file with the Social Sciences Division Office by the completion of a student's junior year. <no change>

Catalog description:	This is an interdisciplinary program housed in the Division of Education. The program is administered by the sport management coordinator. Core courses in sport studies and athletics and in management build a foundation of knowledge and skills related to managing, planning, organizing, budgeting, leading, marketing, and evaluating within the context of an organization or department whose primary product or service is related to sport or physical activity. Carefully selected elective courses prepare students for graduate study (e.g., in business, law, or sport management) or a career in the sport or fitness industry (e.g., athletic director, sport agent, sport marketing, sport media, and managing professional and amateur sport organizations, parks and recreation areas, or sport governing bodies).	<no change>

Narrative Materials

[Hide Section](#)

Brief summary or overview of reason for proposed new program or rationale for changes: Sport management has been the most popular area of concentration at UMM for over 10 years, graduating over 60 students since 1997-1998, and averaging 10 students per year for the past five years. The proposed major will update the requirements and improve the balance of courses and level of rigor.

Updating for 2013-2015 catalog. The only changes made are the removal of an inactive course from the electives (BIOL 4004) and addition of SOC 3103 to

		electives.
Program Delivery:	<ul style="list-style-type: none"> Classroom (majority of program is face-to-face) 	<no change>
Mission, Priorities and Interrelatedness:	<p>The proposed interdisciplinary Sport Management major will provide a rigorous undergraduate liberal arts education via an interdisciplinary mix of courses (i.e., SSA, MGMT, STAI, PHIL, ECON, CMR). Currently, the sport studies and athletics (SSA) discipline of the Division of Education provides students with the opportunity to be trained as coaches or to receive an area of concentration in sports management. Course work is also offered in lifetime activities and fitness. The new major is designed to align with the UMM mission in its integration of liberal arts learning outcomes and goals. It is interdisciplinary, requiring similar amounts of course work from the SSA and management disciplines, as well as additional course work from philosophy, statistics, and economics. It serves as a way to educate graduates who can then positively influence communities, from rural to global, regarding their physical health and well-being. Student interest in this area of study is large and long-standing. Students will benefit from the program by graduating with a major, rather than an area of concentration. The proposed major has been developed to coincide with current national accreditation standards, other sport management programs, and UMM's programs in an effort to provide students with a meaningful, rigorous, and marketable curriculum. Students deserve the most current and competitive curriculum available and this new curriculum meets those goals.</p>	<no change>
Need and Demand:	<p>Based on the current number of students who are interested in the Sport Management area of concentration each year (i.e. 10) and the input from Bryan Herrmann, the University of Minnesota, Morris, Associate Director of Admissions, the annual number of applicants for the program will likely be greater than 10. To put this number in perspective, sport management is by far the area of concentration that has had the largest average number of graduates over the past five years (10 per year). The next closest areas of concentration are Multicultural Studies, Environmental Studies, and International Studies, with five-year graduation averages of 2.2, 1.4, and 1.4, respectively, per year. In 2010, sport management accounted for more than 65% of all area of concentration graduates. Further, the 2010 class of sport management graduating seniors had the 7th most graduates when compared to existing majors. The proposed major will create a personalized program of study, as with other majors at UMM. The University currently has qualified faculty to teach the courses who are committed to the program. The inclusion of this major is compatible with the level of involvement our students have in sport, physical activity, and recreation. For example, one out of every five students at UMM is involved in collegiate athletics. As sport has grown and evolved in this culture, the impact of sport has become sophisticated and complex. Sport management, as an area of study and a career path, includes a broad spectrum of opportunities. This major will prepare UMM students to be leaders by providing them with a comprehensive awareness of sport and its historical and cultural development, its sociological and psychological foundations, its role in the American economy, and its business, legal, and ethical characteristics.</p>	<no change>
Comparative Advantage:	<p>In an effort to create a nationally recognized sport management curriculum, the proposed major follows the accreditation standards of the Commission on Sport Management Accreditation (COSMA). The COSMA is the result of a joint effort by the North American Society for Sport Management (NASSM), and the National Association for Sport and Physical Education (NASPE). The proposed curriculum offers a compatible format to other institutions offering a major in sport management, but it is distinctive in that it is truly interdisciplinary, grounded in the liberal arts, and will provide students with an education that includes a breadth of knowledge that is traditional at UMM. The intended geographic service area parallels the existing service area of UMM. That area is primarily, but not limited to, Minnesota. The prospective student market includes those students who are interested in both a liberal arts education and the specific area of sport management. Another potential service area is China. Almost 40 incoming students from China will be studying economics or management and some of those students may be interested in adding a sport management major to their course of study.</p>	<no change>
Efficiency, Effectiveness, and use of Resources:	<p>Most of the required courses are already in place and currently servicing students in the sport management area of concentration. New courses for the program will be supported by reducing or replacing previously required course offerings and will be taught by existing faculty. Two new courses will be developed. One is an introductory course that will provide students with a foundation in sport management. The second is a course that will serve as an integrative capstone for students in the major. It will include independent research and a public presentation. Any new courses will be balanced with decreases in existing courses offered in the SSA area. Some courses in the current area of concentration are not included in the proposed major and will be offered less often. This change will increase faculty resources available for new course work. The existing faculty in management and SSA can support the major. With growth in the program, a tenure-track position may be needed. The existing physical facilities will accommodate the proposed major. No new information technology materials are required. No new library collections or support services will be necessary immediately.</p>	<no change>
Program Quality and Diversity Goals:	<p>Meeting the standards of COSMA, students will develop, personally and professionally, into well-educated, ethical, competent sport management professionals. Graduates will demonstrate critical thinking and interdisciplinary knowledge associated with UMM's liberal arts mission and education. Learning outcomes: 1. Socio-Cultural: Understand that sport is a microcosm of society, influenced by cultural traditions, social values, and psychosocial experiences; 2. Management & Leadership: Understand concepts of management and leadership by describing the various skills, roles, and functions of sport managers; 3. Ethics: Analyze moral issues related to sport in its intrinsic and extrinsic dimensions; 4. Marketing: Apply fundamental marketing concepts to the sport industry; 5. Communication: Demonstrate effective oral and written communication skills; 6. Budget & Finance: Understand budget and finance as a critical component of all sport industries; 7. Legal Aspects: Understand legal concepts in areas that they are most likely to encounter within the sport management environment; 8. Economics: Understand basic economic principles and apply those principles to the sport industry; 9. Governance: Understand various agencies that govern sport and identify their authority, organizational structure, and functions. Assessments include performance on course assignments and examinations, including papers, presentations, projects, discussion and participation. Key assessments: 1. Research paper and public presentation in capstone course; 2. Service learning project in Sociological Aspects of Sports or Psychological Aspects of Sports; 3. Self evaluations completed in introductory and capstone courses, and 4. Internship evaluation (when applicable). The Division of Education will conduct program evaluation as part of UMM's seven-year discipline evaluation schedule.</p>	<no change>

Program Development: The curriculum was developed by examining existing curricula from other universities and the accreditation standards for sport management. That curriculum was refined via several consultations and meetings with Management faculty and in consultation with SSA faculty. Program quality from the learner perspective was addressed by following existing accreditation standards. Quality from the disciplinary perspective was addressed by examining curricula from existing universities that offer sport management and by consulting with faculty in the Management, SSA, and Education areas. <no change>
