The Market for Winter Skiing in Two Minnesota Areas	7	Vegetation in a Portion of the Regional Copper-Nickel Study Area	19
. . . RICHARD O. SIELAFF		. . . NANCY SATHER	
Association of Aquatic Insects to Macrophytes in an Agricultural Ditch	9	Land Cover Changes in a River Valley, Blue Earth County, Minnesota 1938-1974	22
. . . KEVIN KING, JOHN FYLPAA, HENRY QUADE		. . . CORRIE SCHAFFER COWLEY	

ON THE COVER — Research sampling during the winter can be a difficult problem in Minnesota's streams or lakes because of low temperatures and ice. James E. Erickson devised a net to be manipulated by only one person instead of requiring two individuals to work in the cold water. Use of the one-man net is illustrated in the cover photo, identified as Figure 1 of the descriptive article, which also contains another photo.

The Minnesota Academy of Science does not take a stand on issues which may be discussed in articles published in the *Journal*. Readers should bear in mind that views expressed in these articles are strictly those of the authors.
