ON THE COVER — Three former presidents of the Minnesota Academy of Science who had been key figures in development of the Cedar Creek Natural History Area are pictured. The Academy and the University of Minnesota were organizational partners in creating the nature research facility about 40 miles north of the Twin Cities. Shown are (1) Dr. Walter J. Breckenridge, retired director of the Bell Museum of Natural History at the university, who was Academy president in 1947-48, (2) William H. Marshall, Academy president in 1955-56 and director at Cedar Creek through a major period of growth, (3) Dr. Laurence M. Gould, who headed the Academy in 1938-39 and was a distinguished Antarctic scientist-explorer and Carleton College faculty member. Photos from time of Academy-Cedar Creek activity.

Donald Lawrence, another Cedar Creek pioneer and leader, was photographed while reviewing the project's history with a slide presentation during the Academy's 1981 fall meeting at Martin Lake Camp near the laboratory.
