## Notice to Contributors of Articles

### Publication policies

Membership in the Minnesota Academy of Science is a desirable but not necessary condition of publication in the JOURNAL. All papers by residents of Minnesota, staff and students of Minnesota high schools, colleges, and universities, that meet the editorial criteria of the Academy will be considered for publication. Papers are accepted with the understanding that they have not been published, submitted, or accepted for publication elsewhere. Short reports of work published elsewhere are welcomed, however, providing copyrights are not infringed.

### Types of papers

The JOURNAL welcomes all papers of scientific interest to the membership and to residents of Minnesota, such as articles, reports of research, abstracts of work published elsewhere, letters of opinion or information, reports of meetings and book reviews. All papers should be prepared in the form best suited to its material and purpose.

**EACH PAPER MUST BE ACCOMPANIED BY AN ABSTRACT AND A BRIEF PROFESSIONAL BIOGRAPHY OF THE AUTHOR/AUTHORS. TWO COPIES SHOULD BE SUBMITTED.**

### Proofs

One set of galley proofs will be provided for each paper. Alterations should be kept to an absolute minimum and should be marked on the galley, not on the manuscript. The Academy reserves the right to bill authors for textual revisions after type has been set. Corrected proofs should be returned to the Editor as quickly as possible.

### Reprints

Reprints are provided at cost. The minimum order is 100 reprints. Order forms follow publication.

### Preparation of manuscripts

All manuscripts must be prepared on a good grade of white bond paper and double spaced throughout. Do not use yellow second sheets, thin or "erasable" paper. Do not use single spacing anywhere.

### Footnotes

Footnotes should not be used. In most instances, the information can be incorporated in the text. Do not use footnotes for references or citations.

### Illustrations

Photographic illustrations should be black and white prints with glossy finish. Charts or sketches should be done in simple, fairly heavy lines, with a minimum of lettering wherever possible. All illustrations should be identified with the articles. It is in the discretion of the editor to select or eliminate submitted photos; and in most cases it is impossible to use more than four illustrations with any single article.

### References

References should be arranged alphabetically in the following form:

- Book:** Andover, P. 1961. *A study of New England Rocks*. Boston, Provincial Press.
- Chapter:** Exeter, C., and Andover, P. 1961. Vermont Granite. In Andover, P., Editor. *A Study of New England Rocks*. Boston, Provincial Press.
- Journal article:** Andover, P., Exeter, C., and Choate, S. 1962. Additional Notes on New England Rocks. *Geol.*, 24:12.

### Subheadings

Insert subheads in appropriate places in the text. Keep them short and meaningful. Avoid use of "Introduction" at beginning of paper or "conclusion" near end.

### Summary

Do not use a summary if it duplicates the information in your abstract.
