## LAMB FEEDERS DAY IS SET FOR FEBRUARY (

Thursday, February 9, 1961, is the date set for the annual Lamb Feeders Day to be held at the University of Minnesota, West Central School and Station, at Morris.

The program will start at 10 a.m. in Edson Hall with reports on this year's feeding trials. Highlights of this year's program will include reports on lambs fed out in cornfields. Lambs were allowed to graze the cornfields prior to picking and shelling and then were used to glean the cornfields after picking and shelling. This year's report will also include another year's study of pellets. Pellets this year included oats, barley, and corn in their composition. The day's program will include reports of interest to the lamb feeder and to the flock owner. A farmer-feeder will also be included in the program.

A lamb dinner will be served in the school dining hall at noon and the afternoon's program will include speakers and demonstrations of interest to area sheepmen. The local newspapers and radio stations in each community will carry more detailed announcements of the program as this date nears.
