News Release from:  
University of Minnesota  
University of Minnesota, Morris  
Morris, Minnesota  
January 25, 1962

For Immediate Release

Preparations are being completed this week for the flight training course and ground school to be offered by the University of Minnesota, Morris beginning Tuesday, February 6.

These two courses are among six being offered at UMM on Tuesday evenings starting on that date. Art, history, library science and music courses will also be available.

Under instructor Donald Uhlenberg of the University of Minnesota Flight Facility, the ground and flight schools will meet for three hours at 7:30 p.m. each Tuesday for 12 weeks.

Primary objective of the program is to prepare students to pass the private pilot written examination. For this reason many residents of the Morris area may wish to register in the ground school only without taking flight training. Cost of the ground school alone is \$30. Flight training, including dual and solo flying, and ground school combined will cost \$175.

The ground school course will cover air navigation, radio aids, meteorology, flight theory and analysis of flight maneuvers, aircraft and engine operation, civil air regulations, aircraft instruments and other subjects pertaining to the safe, efficient and economical operation of aircraft.

After ground school is underway students also enrolled in flight training will begin dual flying instruction under Mr. Uhlenberg. An airplane will be furnished by the University Flight Facility.

Registration will be made in each course at the time of the first meeting

February 6. Flight training is limited to a maximum of 10 students but ground school will require a minimum enrollment of 20 students. High school graduation is not a requirement for either course.

Further information on the ground and flight schools may be obtained from the Office of the Dean, University of Minnesota, Morris.
