For Immediate Release

West Central Minnesota residents who would like to use students for various types of summer employment, were reminded this week of the diversified experience and skills available among the college students at the University of Minnesota, Morris.

Summer employment is vital for a great number of college students who depend to a large extent upon work during the summer months to enable them to continue their college education, according to Charles C. Hanna, assistant director of student services at UMM.

Since only two months of the school year remain, UMM students are now looking for summer work, Mr. Hanna noted. Their past experience qualifies them for many types of positions and, he added, the generally above average intellectual ability and special aptitudes of college students make it possible for them to learn new skills quickly.

A large portion of the UMM men have farm backgrounds and are accustomed to heavy work making them well-suited for construction jobs.

Employers who have an opening for one or more students may contact Mr. Hanna at the University of Minnesota, Morris. He will arrange for interviews with available students.

UMM SUMMER SCHOOL (continued)

Orientation and registration will be held on Monday, June 11. Prospective students may reserve space now in any class by requesting registration materials, completing the forms and returning them to the Office of Student Services at UMM. The complete counseling facilities of the Morris campus are available to all prospective summer students.

Further information on the summer session may be obtained from Charles C. Hanna, Office of Student Services, University of Minnesota, Morris.
