

## **UMM Faculty Development Committee**

### **Proposed Center for Educational Innovation priorities:**

#### Long-term development:

- Cohort development and support for early career faculty through regular programming
- Faculty networking / community building among faculty through facilitating conversations on teaching related NCPDD programming or other resources (i.e. - evening viewing of webinars with open discussion following). This could also increase faculty interest in classroom observations and/or individual consultations with David.
- System wide access to online CEI resources and workshops for faculty – access, travel funding, etc?

#### Topical programming priorities:

- Curricular support of diversity / pedagogical techniques for working with underrepresented groups
  - first generation students
  - minority and international students
  - minorities and women in the STEM disciplines
- The first-year experience - teaching transitional skills, raising awareness for resources, promoting tenacity, rebranding support, etc.
- Mental health in the classroom
