It has been accepted for inclusion in Chancellor's Papers by an authorized administrator of University of Minnesota Morris Digital Well. For more information, please contact skulann@morris.umn.edu.

Chancellor's Papers (A1)

The Chancellor's Papers comprise a large record group and cover much of the period through the administration of Samuel Schuman. The materials are further divided into a number of discreet record series: Regents Materials, Budget, Campus Buildings, University Committees, UMM Committees, Syllabi, Enrollment, Financial Aid, Legislative Relations, All-University Senate, Student Organizations, Legal and Artifacts, and Miscellaneous and Correspondence. The latter record series proved to be unwieldy and in 2010 was reorganized into 22 record sub-series. These materials provide much of the administrative history of the campus.

Upon the establishment of UMM in 1960, Rodney Briggs, who had been hired to serve as superintendent of the West Central School of Agriculture and oversee the transition to the college program, was named Dean. Briggs served in this position until 1969 at which time John Q. Imholte was named Provost. In 1985 the title of the office was changed to Chancellor, and Imholte continued in that role until his return to the classroom in 1990. David Johnson replaced Imholte, and he, in turn, was succeeded by Samuel Schuman, originally in an interim role, in 1998. Jacqueline Johnson followed Schuman in 2006.

UMM Miscellaneous and Correspondence (A1-K)

Materials in this series address a broad range of topics, including, advising, energy, alumni relations, administrative reorganization, annual reports, animal facilities, biographical sketches, community outreach, computer information, counseling and course offerings, disability services, institutional data, and safety and planning.

The record series which was originally haphazardly organized and unwieldy has been reorganized into twenty-two categories and assigned locator numbers: A1-K-a to A1-K-v.

Health and Safety (A1-K-I)

These records--the majority of which are in the form of correspondence, memoranda and reports--comprise an eclectic mix of materials. Most of these materials involve issues of health and safety on campus. Other files represent the role of campus administrators in public health and safety issues involving the local communities. For example, two large files document the administration's participation in a community-wide attempt to attract medical doctors to the area in the early 1970s. Other materials include: health and safety inspections of Food Service and the Science Building, the environmental impact of the Highway 59 extension in the 1970s, an obviously misfiled folder reflecting the debate over the Health and Fitness major, a folder marked "Handicapped" from 91-92, accident reports, materials related to fire safety, and a large folder dedicated to the University's health care plan in 1992 and 93.

Correspondents: Edward LaFave, John Q. Imholte, David Johnson
