Objective of Collaboration

We are an all girls school based in Melbourne CBD, Australia, investigating rights, roles and responsibilities of being an active community member. We are interested in learning more about other school communities.

5 STAGES OF CLIMATE GRIEF

- DENIAL - it is NOT getting warmer, or our fault
- ANGER – I do NOT want to change my lifestyle
- BARGAINING – warming will be a lot nicer...
- DEPRESSION – its too late, doom doomed
- ACCEPTANCE – lets get on with it.

Where Do You Want to Go Today?
A collaborative videoconference project gives you and your students an opportunity to learn with another school or classroom.

CAPspace is a social networking tool for educational videoconferencing. Login to find colleagues and schools interested in collaborative videoconference projects. Create and advertise your own collaborative videoconference projects to educators around the world. CAPspace also provides registration for collaborative events and projects such as TWICE’s Read Around the Planet.

TWICE and Polycom also provide a free searchable content database offering educators worldwide access to more than 2000 programs from over 300 different content providers. The database contains content providers, educational outreach programs from organizations such as zoos, museums, author’s, experts in the field and much more. The database is accessible directly or from inside CAPspace. There are currently 15833 educators from 61 countries registered with CAPspace.

CAPspace is made possible by funding from Polycom: Providing Telepresence, Voice and Video Conferencing Solutions.
